

Roy Product Case Study For Cutting Disc

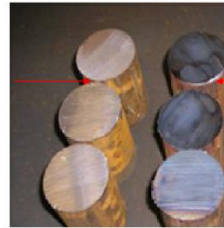

Cutting disk is bonded by resin bond with natural or synthetic abrasive grains. There are various shapes of this product. As long as the cost increasing in various industries, most of the manufactures are facing the cost down pressure. Roy ceramic grain can give best solution to improve cutting efficiency.

- Cutting Disk
- Cutting disk made with Roy ceramic grain (particle-shape grain)

Customer: Internal
Competitor: BFA
Material: Stainless Steel
Material: Rod Diameter 13mm
Temperature: Cool
Competitor Spec: A46
Wheel Size: 105*1.2*16
